LUMBAR SPINE 5:

- (1) Abdominal Curl
- (2) Quadricep Stretch
- (3) Hamstring Curls

LUMBAR SPINE 6:

Towel in mid lumbar spine 10 - 15 minutes morning and evening.

LYING ON SPINAL SUPPORTS

This procedure allows the discs of the spine to mold into proper position. Its continued application will assist in normalizing the curves in your spine. You should lie on the supports at least 15 minutes in the morning and evening.

The support for your neck should be close to the top of your shoulders allowing your head to fall over onto the bed. The support for the low back should be just above the hips. The supports should exert a mild pressure but they should not hurt.
